PROFILE

Senior UI/UX Designer with 20+ years of experience who co-founded a web agency, scaled it from 3 to 70 people, and personally designed 100+ projects for brands like Virgin Media, Land Rover, and Bosch - with work featured in leading CSS galleries.

One of the rare designers who ships production code: I deliver from user research and wireframes through pixel-perfect, accessible, responsive front-end - zero handoff loss, fewer revision cycles, faster time to launch. Accessibility advocate since 2005, long before WCAG compliance became an industry standard.

Chose craft over management for 20 years because staying hands-on is how I do my best work - and it's why clients kept coming back.

EXPERIENCE

Co-Founder, Senior Designer & Front-End Developer

2005 - 2023

Eton Digital (acquired by Holycode)

- Launched agency as web accessibility specialists in 2005 and scaled it from 3 to 70 employees across 3 offices (London, Niš, Novi Sad) - design quality directly generated enterprise-level contracts and drove 18 years of uninterrupted revenue growth.
- Designed and shipped 100+ responsive websites for Virgin Media, Land Rover, Bosch, Martini, Kate Bush, and Ana Ivanovic - earned repeated features in leading CSS galleries, strengthening brand positioning and inbound client pipeline.
- Executed the full UX/UI lifecycle - user research, user flows, wireframing, interaction design, visual design, prototyping, and mobile-first, accessible HTML/CSS/JavaScript - reducing revision cycles by handling design and development as a single workflow.
- Standardized component-based design systems and reusable pattern libraries across 50+ projects - accelerated project kickoffs, enforced brand consistency, and reduced front-end development time on recurring deliverables.
- Partnered cross-functionally with developers, project managers, and clients in agile environments - chose to remain the senior hands-on designer for the full 18-year run, prioritizing craft and output quality over management.

Senior UI Designer & Front-End Developer

2023 - 2025

Holycode d.o.o

- Sustained full client delivery through a company acquisition - designed and developed projects end-to-end, ensuring zero disruption to quality or timelines during the organizational transition.
- Engineered scalable design systems using SCSS component libraries, WordPress ACF, and Gutenberg blocks - reduced new page build time and empowered clients to extend and maintain their UI independently post-launch.

Web Designer & Developer

2002 - 2005

Freelance

SKILLS

User Experience Design (UX)	expert
User Interface Design (UI)	expert
Visual Design & Typography	expert
Wireframing & Prototyping	expert
Design Systems & Component Libraries	expert
Figma	expert
Responsive Web Design (Mobile-First)	expert
Accessibility (WCAG)	advanced
HTML / CSS / SCSS	expert
JavaScript	advanced

Front-End Frameworks (React, Vue, Svelte)	competent
CMS Development (WordPress, ACF, Gutenberg)	expert
AI-Assisted Design & Development	advanced
Cross-Functional Collaboration (Agile)	advanced
Version Control (Git)	advanced

EDUCATION

Associate degree in Mechanical Engineering - Faculty of Mechanical Engineering, Niš, Serbia

LANGUAGES

English	advanced (C1)
Serbian	native
